PROFILE

Android developer building Kotlin and Java applications since 2017. Experience at MEGOGO and CHI Software across streaming, healthcare and connected devices. Hands-on work with Jetpack Compose, Coroutines, Flow, Room and REST APIs, alongside independently published Google Play apps. Seeking a hands-on Android development role.

EXPERIENCE

MEGOGO | Android Developer

Mar 2025 - Nov 2025

- Migrated legacy XML screens to Jetpack Compose in the mobile and Android TV streaming application.
- Implemented channel availability and playback entry logic, in-app purchase handling and parental controls.
- Built deep-link handling with Install Referrer and custom URI schemes; improved navigation and error handling.

CHI Software | Lead Android Developer / Android Developer

Sep 2020 - Mar 2025

- Developed Android applications for healthcare, smart home and field inspections using Kotlin, MVVM, Clean Architecture, Coroutines and Flow.
- Symmetry: integrated CameraX, Room, Google Maps, AWS Cognito and Retrofit for inspections with geotagged media.
- Smart Home: led Android development, reviewed code, mentored developers and set up build and deployment pipelines.
- Car Plate Recognition: integrated a native C++ OCR library via JNI/NDK, processed Camera2 frames and managed local caching with Room.

Nitrix Studio | Android / Flutter Developer

Aug 2018 - Aug 2020

- Built native Kotlin/Java and Flutter applications using MVVM/MVP and BLoC; integrated REST APIs, WebSockets and local storage.
- Implemented ExoPlayer media playback, offline downloads and Android Auto integration in music applications; adapted video UI for Android TV.

IT Company | Android Developer

Sep 2017 - Jun 2018

- Developed LiftApp elevator dashboards in Java, integrating a native C++ SerialPort library for FT232 hardware communication.
- Built Wi-Fi Direct remote configuration and Android boot/update workflows for installed tablet devices.

TECHNICAL SKILLS

Languages & UI: Kotlin, Java, Jetpack Compose, XML layouts, Android SDK, Android TV

Architecture: MVVM, MVI, Clean Architecture, Coroutines, Flow, RxJava, Dagger/Hilt, Koin

Data & integration: Room, Retrofit, OkHttp, REST, WebSockets, Firebase, WorkManager

Media & hardware: ExoPlayer, Android Auto, CameraX/Camera2, BLE, Wi-Fi Direct, NDK/JNI

Quality & delivery: JUnit, Mockito, Robolectric, code review, CI/CD, Google Play publishing

INDEPENDENT ANDROID PRODUCTS

Dimalina Studio · Sep 2017 - Present · Independent product development

Design, implementation and Google Play publishing, including Firebase integration, local storage and monetization with Play Billing and AdMob.

Tic-Tac-Toe: 3 Player Game

Mar 2025 - Present

Built a three-player board game with online matchmaking, Firestore synchronization and configurable AI difficulty. Implemented the UI with Jetpack Compose and Material 3.

People Notes: AI Agent CRM

Jan 2025 - Present

Built an offline-first contact journal with Room, search and filtering, background reminders and Google Play Billing.

EDUCATION

PhD (Doctor of Philosophy) - Electronic Communications and Radio Engineering
Kharkiv National University of Radio Electronics (NURE) · 2020 - 2025

Master's Degree (With Honours) - Computer Engineering
Kharkiv National University of Radio Electronics (NURE) · 2018 - 2019

Bachelor's Degree - Computer Engineering
Kharkiv National University of Radio Electronics (NURE) · 2014 - 2018

TEACHING & RESEARCH

KhNUIA - Associate Professor at the Department of Combating Cybercrime
Sep 2026 - Present

MITI - Lecturer at the Department of Communication Systems and Networks
Aug 2025 - Sep 2026

Research in steganographic coding and secure video transmission. Co-inventor of utility model patent UA No. 144599 (2020): Method of non-equilibrium positional coding to reduce the information intensity of the video stream.

ADDITIONAL ENGINEERING

Flutter / Dart and Kotlin Multiplatform; web applications with Next.js and Astro; C++20 compression and ESP32 / LoRa telemetry. Project details: dvbarannik.github.io.

LANGUAGES

Ukrainian (native); English.
