PROFESSIONAL SUMMARY

Senior / Lead Android Developer with **9+ years of commercial expertise** architecting and shipping high-performance mobile applications across video streaming, enterprise IoT, healthcare, and indie commercial software. Deep technical mastery of **Kotlin, Jetpack Compose, Coroutines & Flow, Clean Architecture, and ExoPlayer** streaming ecosystems. Proven track record of engineering for scale: optimized client rendering for millions of active users at **MEGOGO**, led mobile architectures at **CHI Software**, and bootstrapped top-ranked apps with **25,000+ downloads and a 5.0★ rating** as an independent publisher (**DiMALiNA**). Experienced with Android NDK/JNI (C++) and hardware interfaces (BLE, Wi-Fi Direct).

COMMERCIAL EXPERIENCE

Founder & Lead Mobile Engineer / Publisher — DiMALiNA Studio — Indie Products — 09.2017 – Present

- Bootstrapped and published indie Android products with **25,000+ total downloads** and a **flawless 5.0★ rating** on Google Play (*Tic-Tac-Toe: 3 Player Game*, *Brainrot Clicker*, *People Notes CRM*).
- Architected responsive, modern UIs in 100% **Jetpack Compose and Material 3** with custom canvas physics animations, tactile haptic feedback, and procedural audio.
- Engineered real-time cloud data backends using **Firebase Firestore, Cloud Functions**, and offline-first Room synchronization.
- Implemented complete monetization pipelines: integrated **Google Play Billing (In-App Purchases)** and optimized AdMob mediation waterfalls.
- Managed end-to-end publishing lifecycle: Google Play Console releases, alpha/beta tracks, crash diagnostics, and App Store Optimization (ASO).

Android Developer (High-Load Streaming) — MEGOGO — OTT Streaming — 03.2025 – 11.2025

- Developed and scaled the native Android client application for an international OTT video streaming platform with **millions of active users** across Mobile and Android TV.
- Migrated complex legacy XML screens to declarative **Jetpack Compose**, improving screen rendering speed by **~35%** and eliminating layout stutter during catalog browsing.
- Engineered video playback orchestration using **ExoPlayer**, incorporating low-latency adaptive bitrate streaming, channel availability, and parental control locks.
- Implemented robust deep-linking mechanics via Install Referrer and custom URI schemes to support marketing campaigns and automated user onboarding.

Lead Android Developer / Android Developer — CHI Software — Enterprise Consultancy — 09.2020 – 03.2025

- Led mobile development teams in designing and maintaining complex Android applications in Healthcare, Smart Home, and Security domains using MVVM and Clean Architecture.
- Built an automated car plate recognition system using Camera 2 API, integrating a native C++ ALPR OCR library via **JNI / NDK** and caching detections with Room.
- Architected **LiftApp**, a remote hardware configuration tool communicating over **Wi-Fi Direct and BLE** for zero-configuration device discovery and parameter sync.
- Engineered a full-featured music streaming app with offline background playback, custom notification controllers, and Android Auto integration using ExoPlayer and Room.
- Conducted code reviews, defined coding standards, led technical interviews, and mentored junior and mid-level developers in reactive Kotlin patterns.

Android & Flutter Developer — Nitrix Studio — Commercial Agency — 08.2018 – 08.2020

- Developed cross-platform applications using Flutter (BLoC state management) and native Android apps (Kotlin/Java, MVP/MVVM) across fintech and logistics domains.
- Engineered real-time bidirectional communication using WebSockets and integrated RESTful APIs with OkHttp, Retrofit, and offline SQLite/Room caching.

Android Developer — IT Company — Commercial — 09.2017 – 06.2018

- Developed native Android applications using Java and Kotlin according to Google Material Design guidelines and component lifecycles.
- Managed background services, location tracking, push notifications, and integrated third-party RESTful APIs.

TECHNICAL COMPETENCIES & SKILLS MATRIX

LANGUAGES & CORE
Kotlin (Expert), Java (Advanced), C++ (NDK/JNI), Dart, Python, SQL, Bash.

ANDROID UI & JETPACK
Jetpack Compose, Material 3, Android TV (Leanback), Custom Views, Fragments, ViewBinding, Navigation.

ARCHITECTURE & REACTIVE
Clean Architecture, MVVM, MVI, BLoC, SOLID, Kotlin Coroutines, StateFlow, SharedFlow, RxJava 2/3, Multi-Module.

MEDIA & STREAMING
ExoPlayer, VLC, Adaptive Bitrate HLS/DASH, Audio Focus, Background Playback, Android Auto media sessions.

HARDWARE, BLE & NDK
BLE (Bluetooth Low Energy), Wi-Fi Direct, CameraX / Camera 2 API, SerialPort API, Android NDK, C++ JNI bridge.

STORAGE & NETWORKING
Room, SQLite, Proto DataStore, Firebase Firestore & Realtime DB, Retrofit 2, OkHttp, WebSockets, WorkManager.

TESTING & PROFILING
JUnit 5, Mockk, Mockito, Espresso, Android Studio Profiler (Memory/CPU/Energy), LeakCanary, Timber logging.

DI, PUBLISHING & OPS
Dagger 2, Hilt, Koin, Google Play Console, Play Billing (IAP), AdMob Mediation, Firebase Crashlytics, Git Flow, CI/CD.

SELECTED MOBILE & SYSTEMS PROJECTS

LiftApp (Elevator Systems Controller) | Kotlin, BLE, Wi-Fi Direct, Room, Clean Architecture
Architected industrial Android utility for elevator electronic configurations; engineered zero-configuration peer-to-peer discovery over Wi-Fi Direct and reliable parameter synchronization in high-interference environments.

Lucky Loot Boxes | Kotlin, Jetpack Compose, Material 3, Clean Architecture, Coroutines
An interactive simulation game demonstrating custom Compose physics animations, tactile haptic feedback, procedural audio playback, and structured offline state management via Room.

People Notes CRM | Kotlin, Jetpack Compose, Coroutines, Room, MVVM
A privacy-focused offline-first contact and relationship journal featuring fast multi-tag filtering, instant SQLite full-text search, and encrypted backup export.

PolyCodec Android Integration | Kotlin, Android NDK, C++20, JNI
Mobile client integration for high-performance algebraic polynomial lossless data compression, processing large binary arrays directly in native memory buffers.

Bionic Prosthetics Telemetry | Kotlin, BLE, Jetpack Compose, Coroutines
Android mobile dashboard for real-time Bluetooth Low Energy sensor telemetry, strain gauge calibration, and motor status monitoring for advanced bionic hand prostheses.

EDUCATION & ACADEMIC BACKGROUND

Doctor of Philosophy (PhD) in Information Security · Cybercrime Countermeasures & Data Protection — 2021 – 2025
Kharkiv National University of Internal Affairs (KhNUIA)

Master of Science (MS) in Cybersecurity (With Distinction) · Information Security Management — 2019 – 2021
Kharkiv National University of Internal Affairs (KhNUIA)

Bachelor of Science (BS) in Cybersecurity · Information and Communication Systems Security — 2015 – 2019
Kharkiv National University of Internal Affairs (KhNUIA)

LANGUAGES & PROFESSIONAL STRENGTHS

Languages: **English** (Professional Working Proficiency / C1 · Full Technical Communication), **Ukrainian** (Native).
Engineering Leadership: Technical Architecture Design, Code Reviews, Technical Hiring Interviews, Junior & Mid Developer Mentorship, Cross-Functional Team Leadership.
